IMPORTED RUFFLANS The murder of the police officers in Chicago by

ectinitet rioters armed with bombs was the work imported rulhans. Imported ruffians wrought a draft riots during the war, wrought the Rock Springs massacre perpetrated all the out-rages of law and order that have disngured the Pacific coast. President Cleveland, with pardouble fride, pointed out in his message that no genuine American workingman, born and educated under the instruction of our American institutions that are cast in the spirit of fair play a free field of equal rights and no favor, seponsible by word or deed for these abor The country is swarming with imborers of foreign birth of a very low order of intelli-gence, who are devout the reach for the present Russians are ignorant of our language, we are suffering the consequence of free importation of foreign savages who come here filled with the so labet crace to destroy property and strangle the property ho der. The frightful, savage ignorance of these imported rufflans may be gainered from the fact that in Hungary a few Jears ago a men mordered a number of Jews on the abourd suspicion that they had hilled some Christian children with the purpose of using the blood of innocenis for their passaver Garrie in 1840, armed with scythes and pikes, burned and slow and ravished as atrociously as a war party of Apaci exand Galicia is threatened to day with a repeti ion of this awful agrarian riot. The ultra Charlists in England in 1839 crused a dread all riot in Burmingham which was suppressed by the military and police only after serious loss of life. The same year a band of places from 10 000 to 20,000 strong assaulted the jail at Newpert, England, to rescue the lead

ers of the Birmingham riot and were repulsed

with a less of ten knied and fire wounded.

These lots were no infrequent in Engine 1 as late as 1848, when physical force Charlism med es the historian of that day says of "exposure to Thirdr, of reason argument, majorities and edu pation. To the same sort of imported ruffian fear, belong the Irish nibilists, who blew up Clerkenwell jail, murdered Burke and Cavendub, at a tried to blow up the tower of London.
These architects of murder and rain by the dag ger and dynamic are not without many apos-ticle in the great cities of America. They are folish spough to suppose that they can repeat in America the reign of terror that was wrought in the manufacturing districts of England in the sarly days of traces union agitation. The cities of Manchester, Frankfurd and Sheffield were not one time for systematic terrorizing of the worst kind on the part of labor organization. tions. If resembled strongly the fearful despot-ism that was once exercised in the coal districts of Pennsylvania by the "Molly Magurea." If a workman by his independence made himself clinoxious his helps was set on fire, gunpowder was exploded under his windows, or some in ferfal machine flung into his bedream at mid might. The crunes were paid for out of the highly the trades were paid for our or the funds of the unions were ordered and arranged for by the secretary. Tools were destroyed, resthinery spuels in one case a woman was hithded men were tailed and sometimes only wounded to disable them for work. At him chester the clay used by brickmakers was stuffed will needles to main the obnerious workings with negdies to main the obnovious workings of the negdiction interests of kinglant for a number of jettie, but ally died out before the solid bestlik viol only of employers, but of the employers, who soon found out that playing with su is weapons was sporting with a two-edied swood. The allegal tyrandy of trades unions become as interestly to the trades unions because as intolerable to the verking man as I did to the employer Under English law to-day, if a man wil fully

and malicated breaks his contract of service to a gas or water company, knowing that by doing so he might dates great public injery he can be uprisoned Interpretation that person, who uses either violence or in time dation to compel tothe a to act with him it is unlawful in England and punishable by migrisonment to tiid; or injure the look of workmen in order to prevent them from doing bet work it beset workmen to prevent their getting to their work, or to intimidate them into keeping away from it English law puts indistributed and workman on equality it recognises the right of combination, just as the American law does, for every purposa, which is not itself actually contrary to law when exe cuted by an indiv dual. We seem to be spiler ing sporadically from some of the abulitions of careby in labor districts that at one time distorbed and distressed England We shall get rid of our trouble sooner than England be-cause her disorder found her, with laws that needed reform, while our turbulence strikes in rid of our trouble sooner than England because her disorder found her, with laws that needed reform, while our turbulence strikes us when our laws need no liberalizing need nothing so much as their stern enforcement with mischetty it is an outgray on make try it is an outgray on the control of the log so much as their stem enforcement with misshetry. It is an outrage on public common series to oppose resolvers to a mod armed with bombs. A mod armed with such weapons ought to be answered with muskets an I dating a leaf to a leaf t A COLLUL POPIN TISTE

Tallow in Chicago is lower than ever known in the history of the trade it was selling the past, week at 3% cents. It is the reneral opinion of the trade that priets will not go above 4 cents. The low-price of searine has caused many ta mers to abolish the use of tallow. Cotton seed off now so largely employed in the majoralacture of soaps, is the constraints.

abolish the respot tailow. Cotton seed off now so largely employed in the majurfacture of soaps, is the one or rie cause in the present low ruling prices of tailowand grease.

The German wool manufacturers and farmers are at edds. The farmers cisim that owing to the imports of Cape and Australian wool it is impossible for them to sell their homegrown wool at remainmentative beines. They assert that the price of all the wool in manufactures they buy is raised by the projective duties on manufactures british, and they therefore chain that a corresponding duty shall be layled on the raw material. The mill owners reply that in that case they yould be rulined, as wit igut a cheap and abundant supply of the raw material.
